# TALES BY LIGHT

Uniting exploration, photography and the natural world, Tales by Light offers a rare glimpse into the eyes and minds of some of the world's best photographic storytellers.

Produced in stunning 4K resolution, the six-part television series follows five extraordinary photographers as they push the limits of their craft in little-known, little-covered and little-understood corners of the Earth. Experience the challenges, successes and elation as these masters of photography work to capture their unique perspectives.

Driven by an insatiable desire to explore cultures, wildlife and landscapes through the camera's lens, they blur the lines between science, art and photography, showing us our world in a new light.
